SRUJANA 2026 · PROMPT TO PRODUCT

Campus Chakra

UI Screenshots Package · Telemetry dashboard, circular allocation and facility alerts

Submission note. The live prototype opens with a logo reveal, then exposes the Campus Chakra operational experience. This document groups relevant screens and explicit workflow annotations into a single PDF, as required.

1. Campus Chakra entry and telemetry workspace

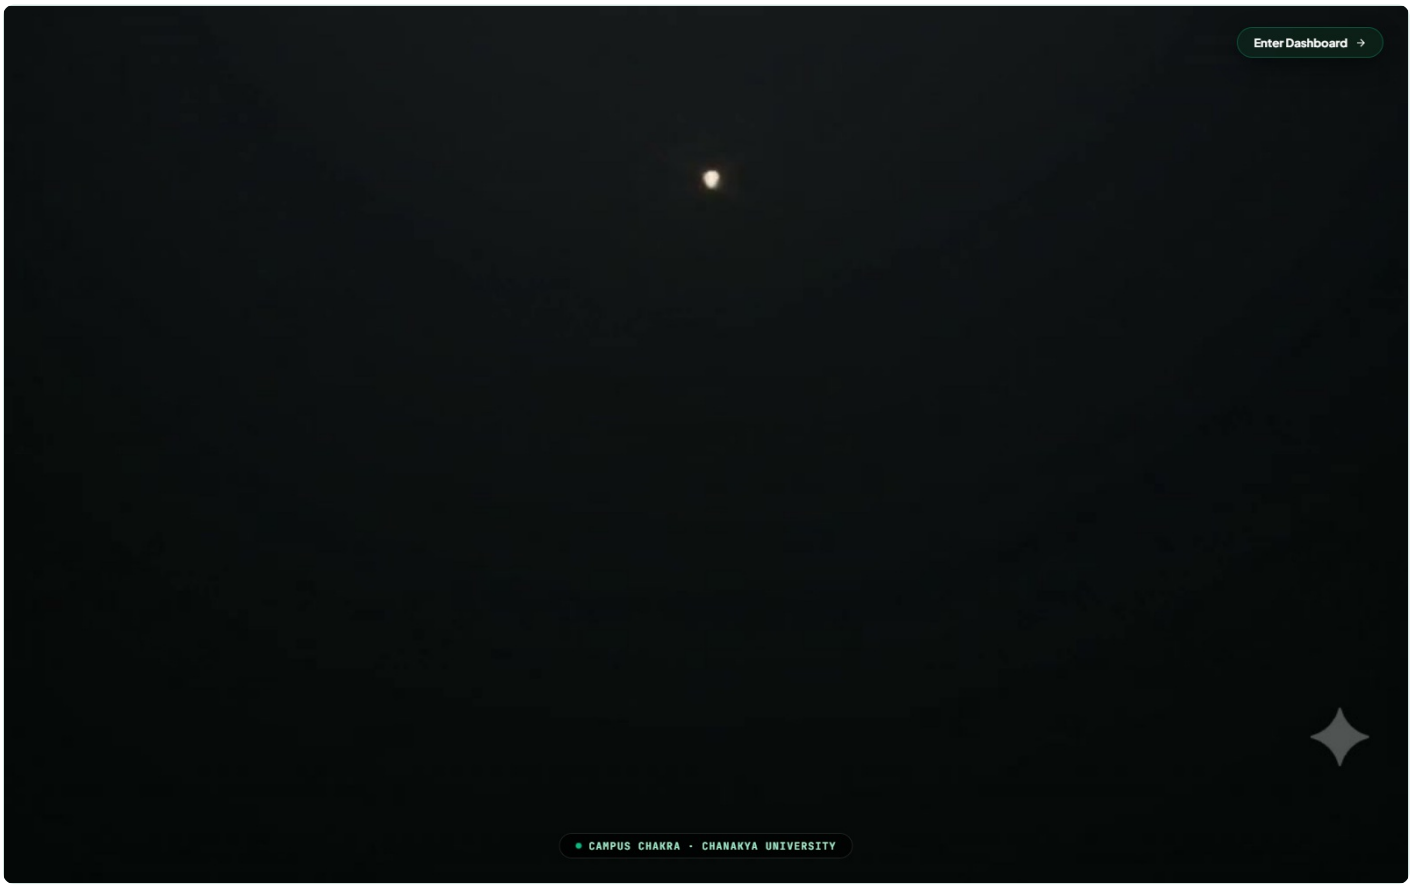

Figure 1 — Live local Campus Chakra capture. The opening state uses the Campus Chakra identity and provides entry to the operations dashboard.

2. Telemetry dashboard

CAMPUS CHAKRA · RESOURCE TELEMETRY

23,192
Hourly records
Time-series monitoring across campus buildings.

6h / 12h
Demand outlook
Operational horizon for electricity and water planning.

8
Facilities
Building-aware resource context and comparisons.

Figure 2 — Telemetry dashboard workflow: ingest validated streams, compare building baselines and surface short-horizon forecasts.

3. Circular waste allocation

CIRCULAR ROUTING · SMART-BIN CLASSIFICATION

Detected material	Confidence-led route	Operations action
Food organic	Composting / biodigester	Assign collection slot
Paper, plastic, glass, metal	Segregated recycler stream	Track diversion and contamination
E-waste	Certified recovery partner	Flag controlled handling

Figure 3 — Circular allocation workflow: the uploaded waste-event sensor fields produce a predicted class, then route materials toward the appropriate recovery path.

4. Facility alerts and action loop

FACILITY ALERTS · EVIDENCE-LED RESPONSE

Signal	Evidence	Action
Unusual water demand	Building baseline + time window + manual-log context	Inspect leak / fixture and close the alert with outcome.
Energy spike	Forecast deviation + calendar / occupancy context	Review HVAC, inverter or scheduled load.
Waste contamination	Smart-bin prediction and low-confidence sensor flag	Trigger bin check or collection-team instruction.

Figure 4 — Facility alert workflow: a signal is tied to evidence and a specific operator action rather than a generic chart warning.
